Supplier Information Letter

Dear valued supplier,

This letter gives you some important updates on our new Röhm organization.

Röhm GmbH successfully completed the carve-out from Evonik Industries. Evonik Industries' Methacrylate Verbund is thus transferred to its new owner, Advent International, as an independent company. With revenues of EUR 1.9 billion (2018 figures) and innovative products, the company is one of the global market leaders in methacrylate chemicals. With the implementation of an innovative production technology for methyl methacrylate, Röhm GmbH is also targeting global technology leadership. The company has around 3,900 employees worldwide across 15 production sites in Germany (Worms, Darmstadt, Weiterstadt, Wesseling, Hanau), China, Taiwan, USA, Mexico, Russia, and South Africa.

Our global presence makes us a reliable partner for our suppliers and customers. For us, limitless partnership means developing the right solutions together with our customers and making their successes our own. The structure of an integrated production network gives us the flexibility we need to respond quickly and dependably whenever circumstances in our industrial markets and at our customers change. For this we build on decades of experience in the field of methacrylate chemistry. At the same time, we are further expanding our technology-based strengths in the integrated production network and are continuously developing new fields of application with our products.

Please find in the Appendix (2) the Business information on our new legal entities.

We greatly appreciate your business and will keep you informed of further developments.

Sincerely yours,

ppa. Christopher Schindler
