Our products

The Röhm product portfolio includes PLEXIGLAS®, the world’s most popular brand of acrylic glass. PLEXIGLAS® is used in cars, airplane windows, screens or displays, as building glazing, noise protection, and in the advertising industry. The indispensable precursor for PLEXIGLAS® is methyl methacrylate.

Methyl methacrylate is also used for the production of varnishes and paints, floor coatings, adhesives, and other materials, including dental products. Other examples of Röhm’s product range are methacrylate resins for the manufacture of industrial flooring and road markings, as well as cyanide for the leaching of precious metals in the mining industry.
Who we are

Röhm is a leading global provider of methacrylate chemicals. Our approximately 4,000 employees offer products and solutions for attractive growth markets such as the automotive and electronics industry and the construction sector. Our best-known brands include PLEXIGLAS®, ACRYLITE®, DEGALAN® and DEGAROUTE®.

Based on our global Verbund, we are able to respond quickly and flexibly to changing conditions in our markets. Reliability and high product quality are our trademarks.

We are traditionally innovative: our company’s founder, Otto Röhm, laid the groundwork for today’s methacrylate chemicals in 1907. Since then, we have continuously expanded our technology-based strengths in the Verbund tapping into new application fields with our products. With long-term investments and targeted expansion, we drive our sustainable growth and further boost our leading market positions.

Our people

Our employees are our particular strength. Together with our customers, they drive our business with their ideas, creativity and passion. As an attractive employer, we support our employees and offer exciting prospects for career starters. Our production sites offer training for young people in a range of professions.

Our responsibility

Our vision of long-term economic success is guided by the benefits of our customers and our responsibility towards our employees, the environment and people all over the world.

We are committed to maintaining the highest standards to prevent accidents and to continuously and reliably optimize the safety of our systems, processes and transport.

Our innovations

With the implementation of an innovative production technology for methyl methacrylate, Röhm is also targeting global technology leadership. This process will set new standards in efficient resource utilization as well as measurable and tangible environmental relief. We are becoming the leading Methacrylate Verbund.
